BAKERY WEBSITE

Project Documentation

1. Introduction

The Bakery Website is a simple and attractive website created to display bakery products in an organized way. It introduces customers to cakes, pastries, cookies, and other bakery items. The website helps visitors view product details, prices, special offers, and store contact information. It is designed using basic web development concepts and a visually appealing layout.

2. Features

• Displays bakery products such as cakes, pastries, and cookies.
• Shows product images and prices to help customers choose items.
• Includes custom cake design ideas and seasonal offers.
• Uses an attractive color scheme and image gallery sections.
• Provides store contact details for customer enquiries.
• Uses a simple, neat layout that is easy to understand and navigate.

3. Applications

• Helps customers explore bakery products online.
• Allows visitors to check product prices and available offers.
• Helps customers discover custom cake designs for birthdays and special occasions.
• Provides store contact information for orders and enquiries.
• Can be used by small bakeries to promote their products and improve their online presence.

4. Conclusion

The Bakery Website is a useful beginner-level web development project. It presents bakery products, prices, offers, and contact details in a clear and attractive format. Developing this website helps students practice HTML and CSS while learning how to create a user-friendly website for a real-world business.
